MEASURING TECHNOLOGY & TEST SERVICE 2024

Load cells

Load Cells SAUTER CB Q1 · CB Q2 · CB P1

Fig. shows accessories, base plate SAUTER CE Q30903 and bearings

2 SAUTER CE Q30904, for further accessories please visit our online shop

Fig. shows optional accessories load corner 3 SAUTER CE P4022

CB Q1 · CB Q2 Bending beam and shear beam load cells made of stainless steel

Technical data

- · Accuracy in accordance with OIML R60 C3
- · CE and RoHS compliant
- Dust and spray protection to IP68/IP69K (in accordance with EN 60529), welded to create a hermetic seal
- · Stainless steel
- Area of application: Weight measurement as well as compressive force in harsh environments
- · Suitable for platform scales, funnel scales, floor scales and other weighing devices
- · 4-wire connection
- · Nominal sensitivity: 2 mV/V
- · Cable length approx. 3 m
- · Note: Accuracy class OIML R60 C6 or EX version on request

CR P1 Load cells made of stainless steel

Technical data

- · Accuracy in accordance with OIML R60 C3
- · CE and RoHS compliant
- · Dust and spray protection to IP67 (in accordance with EN 60529), hermetically encapsulated
- · Nickel-plated steel
- Area of application: Weight measurement as well as compressive force in harsh environments
- · Suitable for platform scales, silo scales, bed scales and other diverse scales
- · 4-wire connection
- · Nominal sensitivity: 3 mV/V
- · Cable length approx. 4 m

Accessories CB Q1 · CB Q2:

- · Traction device, steel, galvanised, suitable for CB Q1, SAUTER CE Q30901
- · Traction device, steel, rustproof, suitable for CB Q2, SAUTER CE Q34905
- 1 Base plate, steel, galvanised, suitable for CB Q1, SAUTER CE Q30903
- Base plate, steel, rustproof, suitable for CB Q1, SAUTER CE RQ30903
- · Base plate, steel, rustproof, suitable for CB Q2, SAUTER CE Q34903
- Bearing, steel, rustproof, suitable for CB Q1 (nominal load 5 kg-50 kg), SAUTER CE Q30904
- · Bearing, steel, rustproof, suitable for CB Q1 (nominal load 75 kg-300 kg), SAUTER CE Q30905
- · Bearing, steel, rustproof, suitable for CB 500-3Q1, SAUTER CE Q30906
- · Bearing, steel, rustproof, suitable for CB 750-3Q2, CB 1000-3Q2, CB 1500-3Q2, SAUTER CE Q34906
- · Load corner, steel, galvanised, suitable for CB Q1, SAUTER CE Q30907
- · Load corner, steel, rustproof, suitable for CB Q1, SAUTER CF RO30907
- · Adjustable foot, steel, rustproof, suitable for SAUTER CE Q34901

* up to max. 500 kg

systems

possible

Adjusting program (CAL) For quick setting of the

instrument's accuracy. External adjusting weight required

Calibration block

Standard for adjusting or correcting the measuring

Peak hold function Capturing a peak value within a measuring process

Scan mode

Continuous capture and display of measurements

Push and Pull

The measuring device can capture tension and compression forces

Length measurement

Captures the geometric dimensions of a test object or the movement during a test process

Focus function

Increases the measuring accuracy of a device within a defined measuring range

Internal memory

To save measurements in the device memory

Data interface RS-232

Bidirectional, for connection of printer and PC

Profibus

For transmitting data, e.g. between scales, measuring cells, controllers and peripheral devices over long distances. Suitable for safe, fast, fault-tolerant data transmission. Less susceptible to magnetic interference

Profinet

Enables efficient data exchange between de-centralised peripheral devices (balances, measuring cells, measuring instruments etc.) and a control unit (controller). Especially advantageous when exchanging complex measured values, device, diagnostic and process information. Savings potential through shorter commissioning times and device integration possible

Data interface USB

To connect the measuring instrument to a printer, PC or other peripheral devices

Bluetooth* data interface

To transfer data from the balance/measuring instrument to a printer, PC or other peripherals

WIFI data interface

To transfer data from the balance/measuring instrument to a printer, PC or other peripherals

Data interface infrared

To transfer data from the measuring instrument to a printer, PC or other peripheral devices

Control outputs (optocoupler, digital I/O)
To connect relays, signal

lamps, valves, etc.

Analogue interface

To connect a suitable peripheral device for analogue processing of the measurements

Analogue output

For output of an electrical signal depending on the load (e.g. voltage 0 V - 10 V or current 4 mA - 20 mA)

Statistics

Using the saved values, the device calculates statistical data, such as average value, standard deviation etc.

PC Software

To transfer the measurement data from the device to a PC

Printer

A printer can be connected to the device to print out the measurement data

Network interface

For connecting the scale/ measuring instrument to an Ethernet network

KERN Communication Protocol (KCP)

It is a standardized interface command set for KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems

GLP/ISO record keeping

of measurement data with date, time and serial number. Only with SAUTER printers

Measuring units

Weighing units can be switched to e.g. non-metric. Please refer to website for more details

Measuring with tolerance range (limit-setting function)

Upper and lower limiting can be programmed individually. The process is supported by an audible or visual signal, see the relevant model

Protection against dust and water splashes IPxx

The type of protection is shown in the pictogram cf. DIN EN 60529:2000-09, IEC 60529:1989 +A1:1999+A2:2013

ZERO

Resets the display to "0"

Battery operation Ready for battery operation. The battery type is specified for each device

Rechargeable battery pack

Rechargeable set

230V/50Hz in standard version for EU. On request GB, AUS or US version available

Plug-in power supply

Integrated power supply unit

Integrated, 230V/50Hz in EU. More standards e.g. GB, AUS or US on request

Motorised drive

The mechanical movement is carried out by a electric motor

Motorised drive

The mechanical movement is carried out by a synchronous motor (stepper)

Fast-Move

The total length of travel can be covered by a single lever movement
