

Mobile Leeb Hardness Tester SAUTER HK-D · HK-DB

# Premium Leeb hardness tester – also with hardness comparison block included

## **Features**

- External impact sensor standard (Type D)
- · Mobility: In comparison with stationary table-top devices and testing devices with an internal sensor, using the SAUTER HK-D offers the highest level of mobility and flexibility
- All measurement directions possible (360°) thanks to an automatic compensation function
- 11 SAUTER HK-DB: Hardness comparison block, hardness approx. 800 HLD, included in delivery
- · Measurement value display: Rockwell (Type A, B, C), Vickers (HV), Shore (HS), Leeb (HL), Brinell (HB
- Internal memory for up to 600 data groups, with up to 32 values per group forming the average value of the group
- · Mini statistics function: displays the measured result, the average value, the impact direction, date and time
- · Automatic unit conversion: The measuring result is automatically converted into all specified hardness units
- · Measuring with tolerance range (limit-setting function): Upper and lower limiting can be programmed individually. The process is supported by an audible and visual signal

- · Matrix display: Backlit multi-function display for all relevant functions at a glance
- Robust metal housing
- 2 Delivered in a robust carrying case

#### Technical data

- Precision: ± 1 % at 800 HLD
- Minimum sample radius (concave/convex): 50 mm (with support ring: 10 mm)
- · Thinnest measurable material thickness: 2 mm, with coupling on fixed base
- · The lowest weight of the test item on solid support unit: 2 kg with fixed coupling
- Overall dimensions W×D×H 148×21×21 mm
- Permissible ambient temperature -10 °C/40 °C
- · Battery operation, 2×1.5 V AA standard, operating time up to 200 h
- · Net weight approx. 0,45 kg

#### Accessories

· Plug-In for data transfer of measuring data from the measuring instrument and transfer to a PC, e.g. in Microsoft Excel®, SAUTER AFI-2.0, see internet

- · Software BalanceConnection, for flexible recording or transmission of measured values, in particular also to Microsoft® Excel or Access as well as transfer of this data to other Apps and programs, for more details see internet, scope of supplies: 1 CD, 1 license, KERN SCD-4.0
- · Support rings for bended test objects, SAUTER AHMR 01
- · Impact body Type D, net weight approx. 0,05 kg, hardness ≥ 1600 HV, tungsten carbide, impact ball Ø 3 mm, in accordance with standard ASTM A956-02, SAUTER AHMO D01
- · External impact sensor Type C. Low energy sensor: requires only 25 % impact energy compared to type D, for testing tiny or light objects or the surface of hardened layer, SAUTER AHMR C
- · External impact sensor Type D, SAUTER AHMR D
- · External impact sensor Type D+15. Slim front section for holes, grooves or re-entrant surfaces, SAUTER AHMR D+15
- · External impact sensor Type DL, for very narrow surfaces (Ø 4,5 mm), SAUTER AHMR DL
- · External impact sensor Type G. High energy sensor: 900 % impact energy compared to type D, SAUTER AHMR G
- · Connection cable impact sensor, SAUTER HMO-A04
- 3 Test block Type D/DC, Ø 90 mm (± 1 mm), net weight < 3 kg, hardness range  $790 \pm 40$  HL, SAUTER AHMO D02  $630 \pm 40$  HL, SAUTER AHMO D03  $530 \pm 40$  HL, SAUTER AHMO D04
- · Factory calibration certificates for SAUTER AHMO D02, AHMO D03, AHMO D04, SAUTER 961-132

## STANDARD

Model	Sensor	Measuring range	Readout	Test block	Option Factory calibration certificate
SAUTER		HL	[d] HL	Typ D/DC approx. 800 HL	KERN
HK-D	D	170 - 960	1	not standard	961-131
HK-DB	D	170 - 960	1	standard	961-131

systems

possible

Adjusting program (CAL) For quick setting of the

instrument's accuracy. External adjusting weight required

#### **Calibration block**

Standard for adjusting or correcting the measuring

# Peak hold function

Capturing a peak value within a measuring process

#### Scan mode

Continuous capture and display of measurements

## **Push and Pull**

The measuring device can capture tension and compression forces

#### Length measurement

Captures the geometric dimensions of a test object or the movement during a test process

#### Focus function

Increases the measuring accuracy of a device within a defined measuring range

## Internal memory

To save measurements in the device memory

#### Data interface RS-232

Bidirectional, for connection of printer and PC

## **Profibus**

For transmitting data, e.g. between scales, measuring cells, controllers and peripheral devices over long distances. Suitable for safe, fast, fault-tolerant data transmission. Less susceptible to magnetic interference

#### **Profinet**

Enables efficient data exchange between de-centralised peripheral devices (balances, measuring cells, measuring instruments etc.) and a control unit (controller). Especially advantageous when exchanging complex measured values, device, diagnostic and process information. Savings potential through shorter commissioning times and device integration possible

## Data interface USB

To connect the measuring instrument to a printer, PC or other peripheral devices

## Bluetooth\* data interface

To transfer data from the balance/measuring instrument to a printer, PC or other peripherals

## WIFI data interface

To transfer data from the balance/measuring instrument to a printer, PC or other peripherals

## Data interface infrared

To transfer data from the measuring instrument to a printer, PC or other peripheral devices

# **Control outputs** (optocoupler, digital I/O) To connect relays, signal

lamps, valves, etc.

## Analogue interface

To connect a suitable peripheral device for analogue processing of the measurements

## Analogue output

For output of an electrical signal depending on the load (e.g. voltage 0 V - 10 V or current 4 mA - 20 mA)

#### Statistics

Using the saved values, the device calculates statistical data, such as average value, standard deviation etc.

## **PC Software**

To transfer the measurement data from the device to a PC

## **Printer**

A printer can be connected to the device to print out the measurement data

# **Network interface**

For connecting the scale/ measuring instrument to an Ethernet network

### **KERN Communication** Protocol (KCP)

It is a standardized interface command set for KERN balances and other instruments, which allows retrieving and controlling all relevant parameters and functions of the device. KERN devices featuring KCP are thus easily integrated with computers, industrial controllers and other digital systems

## GLP/ISO record keeping

of measurement data with date, time and serial number. Only with SAUTER printers

## Measuring units

Weighing units can be switched to e.g. non-metric. Please refer to website for more details

**⊙** 30

#### Measuring with tolerance range

(limit-setting function) Upper and lower limiting can be programmed individually. The process is supported by an audible or visual signal, see the relevant model

#### Protection against dust and water splashes IPxx

The type of protection is shown in the pictogram cf. DIN EN 60529:2000-09, IEC 60529:1989 +A1:1999+A2:2013

#### **ZERO**

Resets the display to "0"

**Battery operation** Ready for battery operation. The battery type is specified for each device

#### Rechargeable battery pack

Rechargeable set

#### Plug-in power supply 230V/50Hz in standard

version for EU. On request GB, AUS or US version available

## Integrated power supply unit

Integrated, 230V/50Hz in EU. More standards e.g. GB, AUS or US on request

#### Motorised drive

The mechanical movement is carried out by a electric motor

## Motorised drive

The mechanical movement is carried out by a synchronous motor (stepper)

## **Fast-Move**

The total length of travel can be covered by a single lever movement
